# SAVE MONEY AND TIME WITH AN EVLINK WALLBOX

With petrol prices on the rise, isn't it time to think about switching to an Electric Vehicle?

## CHARGE YOUR EV IN UNDER 4 HOURS AT HOME

Make life as easy as possible and save time and hassle by charging your EV at home while you relax. There's no need to wait in line at the charging station.

## EASY TO USE

The EVlink Wallbox is incredibly simple to use. Charging your EV is as easy as charging a mobile phone. Plug the EV in, swipe your charge card, and in under 4 hours, your EV will be fully charged. The EVlink Wallbox has a vastly quicker recharge time than plugging into a standard wall socket outlet.

## SAVE \$\$\$ ON PETROL PRICES

Not only does an EVlink Wallbox simplify your life by providing a quick and easy charging solution in the comfort of your own home, it will also save you money. An EV costs just \$2<sup>^</sup> a day to recharge. That equals money back in your pocket! Additionally connect the EVlink Wallbox to your solar system and recharge for free!

## LOOK AFTER THE ENVIRONMENT

The decision to purchase an EV has great impacts on the environment. The use of an EV in place of a petrol-run vehicle reduces greenhouse gas emissions, therefore helping to protect our natural world for us and future generations to enjoy. Who doesn't want to play their part in contributing positively to the environment?
