Know you're in safe hands. With DNA LockDown™

When it comes to keeping your family and valuables safe, it doesn't make sense to compromise. Because cash, jewellery and electronics are at the top of a burglar's hit-list, smart homeowners are turning to remote over-the-air monitoring to protect their home. Contact DNA's specialists today for maximum home protection with minimum expense.

24/7 MONITORING. RAPID RESPONSE.

A dual SIM 4G+IP communicator acts as a bridge between your premises and the command station. This super small, high-speed unit forms the backbone of DNA's LockDown™ system. And delivers 24/7 backup response within minutes for any situation: burglary, fire or medical emergency. If an invasion does occur, the security system will sound an alarm and help will be on its way.

CUT THE CORD. WITH 4G+IP.

It used to be that you needed a phone line for alarm monitoring. But that came with high ongoing call costs. Not only is DNA's LockDown™ system more cost-effective with one flat-fee per week, it's also more secure. With remote monitoring, you'll never have to worry about criminals cutting the line and

disabling your security system. What's more, the DNA LockDown™ system removes NBN compatibility issues by bypassing the entire Telstra / NBN hard-wired network.

SECURITY SPECIALISTS. SAFER SYSTEMS.

A security system is only as strong as the sum of its parts. That's why you need licensed security specialists. DNA guarantee the integrity of the system through thorough testing and only use quality components. Not only do we provide remote over-the-air monitoring through our DNA LockDown™ system we also deliver, install and test home alarms, intercoms and CCTV cameras for a complete turn-key security solution. Contact DNA's security specialists today to secure the things that are special to you.

Installation and
commissioning
only \$299.00
